

XAMPP DOCUMENTATION

Step 1: Download the setup from the official website (www.apachefriends.org)

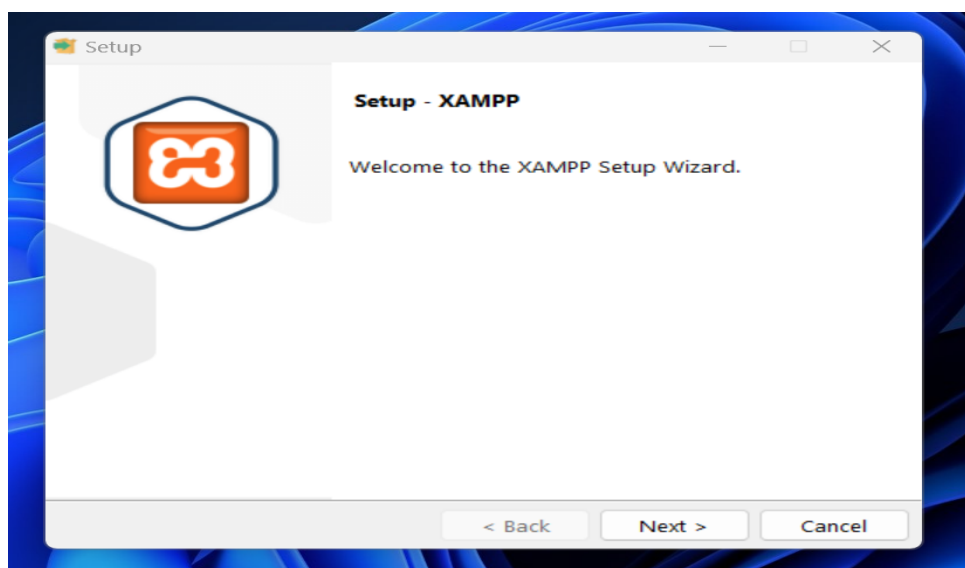

The screenshot shows a web browser window with the address bar displaying 'apachefriends.org/download.html'. The page has a large 'Download' heading. Below it, a paragraph states: 'XAMPP is an easy to install Apache distribution containing MariaDB, PHP, and Perl. Just download and start the installer. It's that easy.'

Below the paragraph is a section titled 'XAMPP for Windows 8.0.30, 8.1.25 & 8.2.12'. It contains a table with the following data:

Version	Checksum	Size
8.0.30 / PHP 8.0.30	md5 sha1	144 Mb
8.1.25 / PHP 8.1.25	md5 sha1	148 Mb
8.2.12 / PHP 8.2.12	md5 sha1	149 Mb

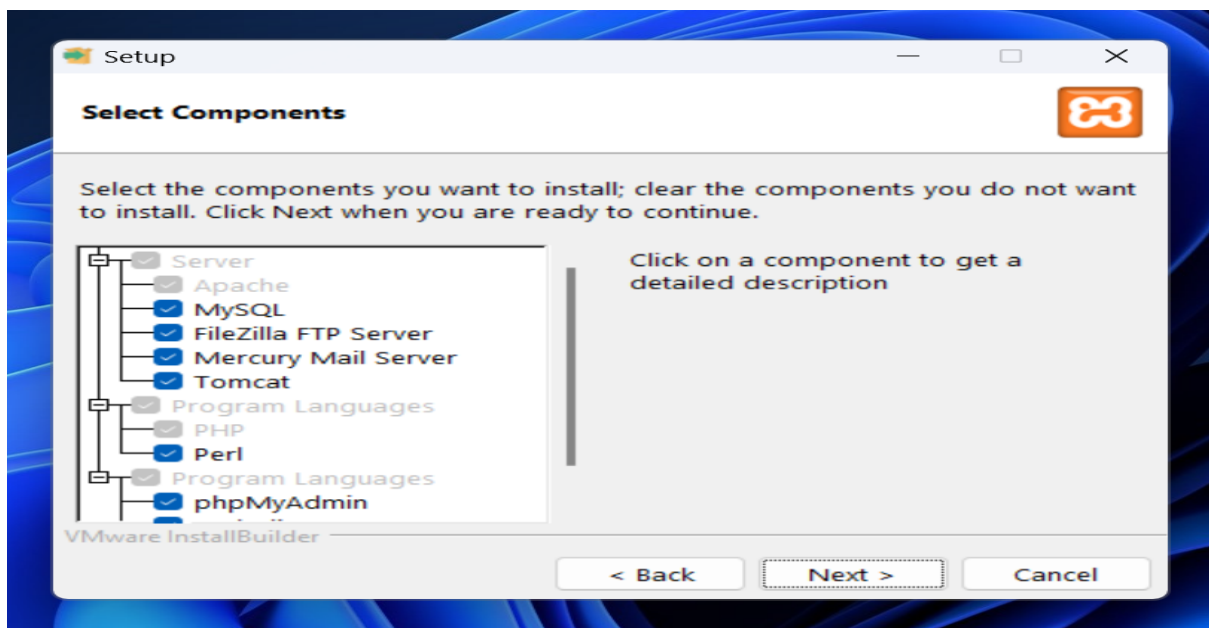

Each row in the table has a 'Download (64 bit)' button next to the size column. There are also links for 'What's Included?' for each version.

Step 2: Open the setup and click on the next button.

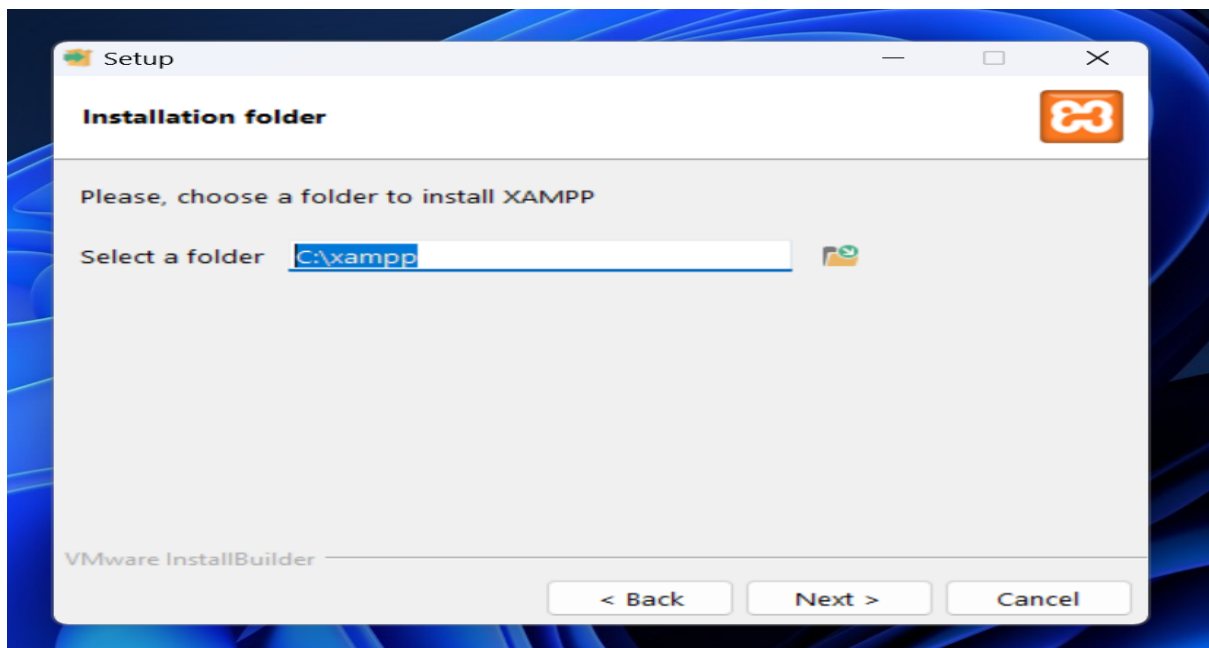

Step 3: click on the next, with the default settings.

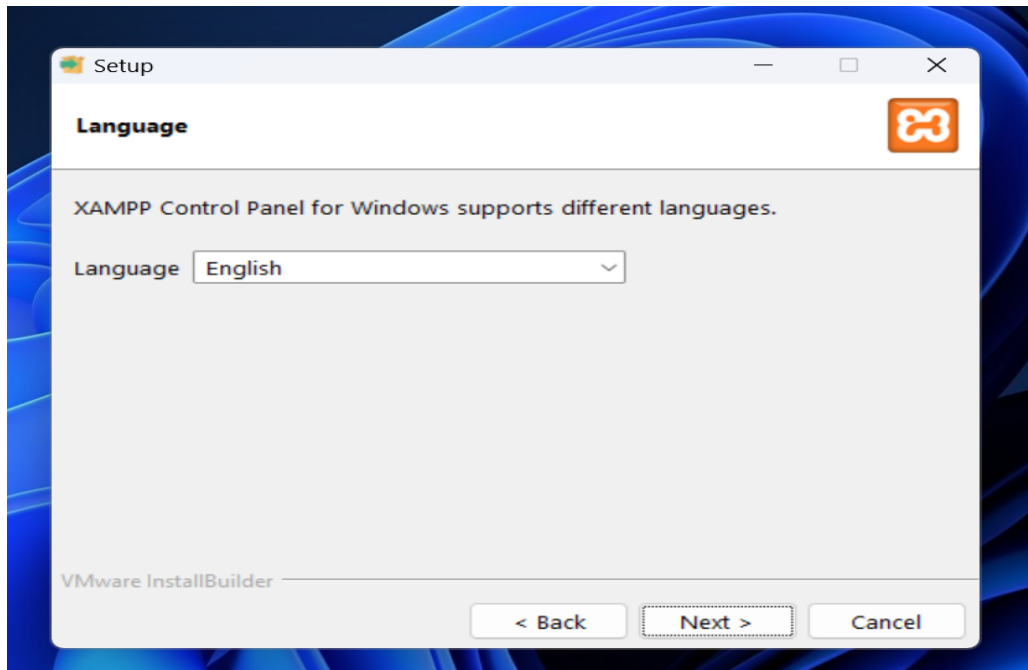

Step 4: Select the folder in which you want to install this or remain it default.

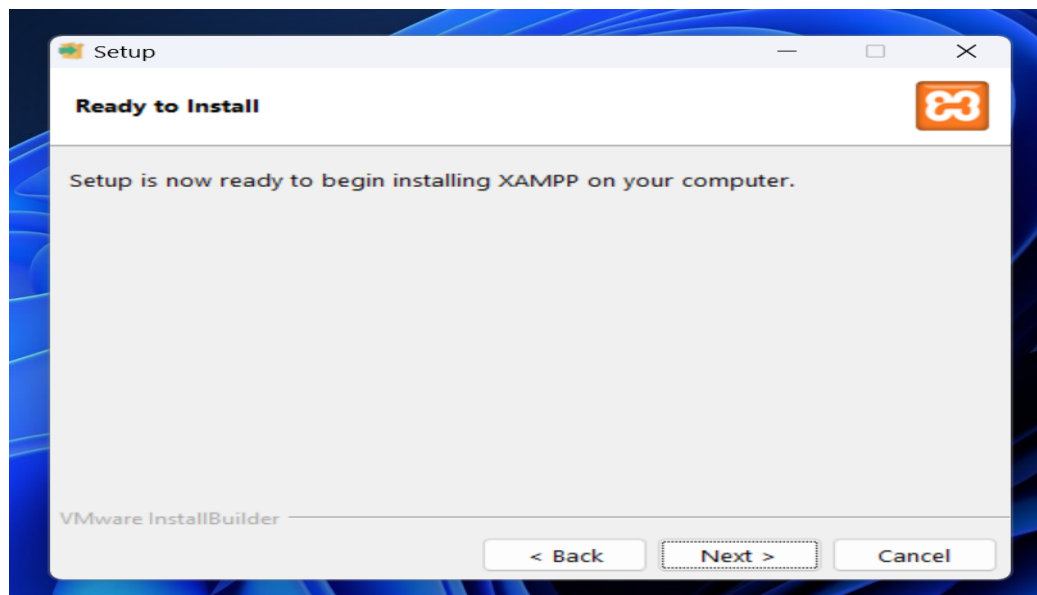

Step 5: Choose the language in which you want to use it , then click on the next button.

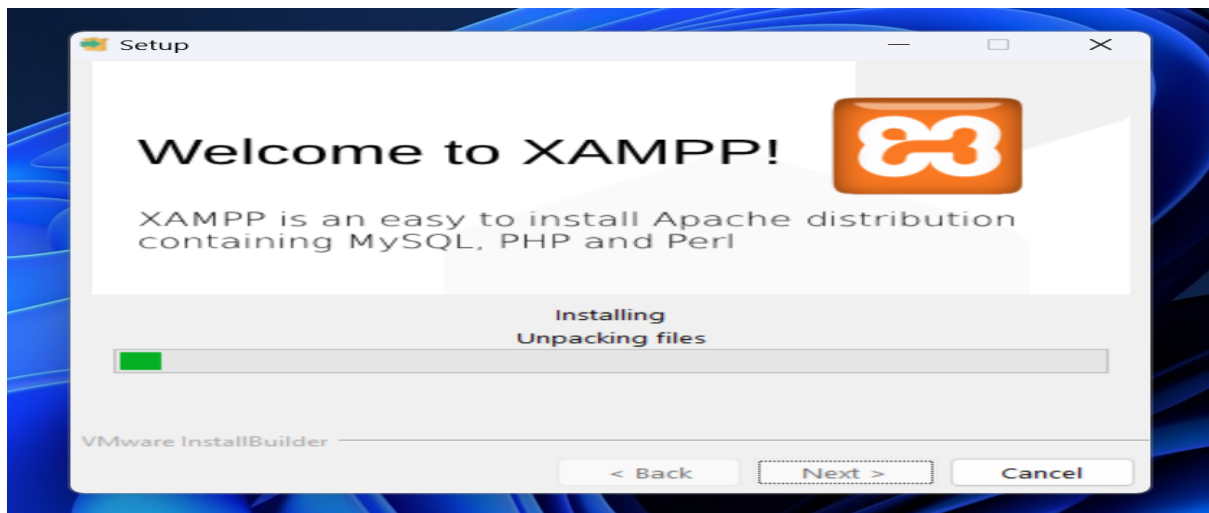

Step 6: Click on the next button.

Step 7: To start installation, click on the next button. This process will take 5-10 minutes.

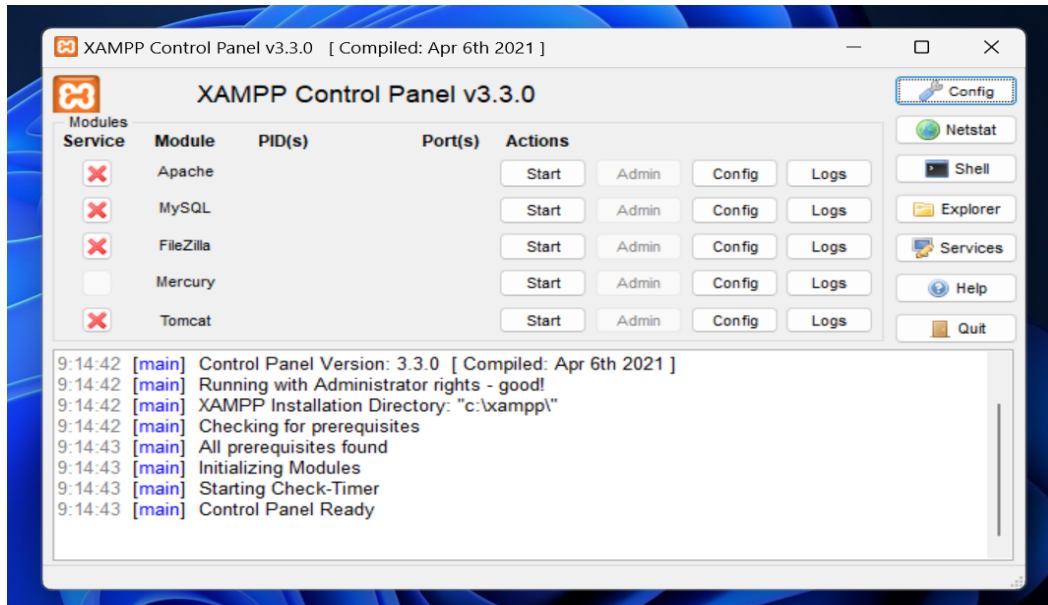

Step 8: If you want to start the control panel just after the finish then check tick on the check box. And then click on the finish button.

Step 9: Now open the XAMPP control panel and start the services which you want to use.

Step 10: Now it is ready.
